Message from the Guest Editors

This Special Issue mainly focuses on the relationship between sustainable transport policy, environmental management and energy economic development. We aim to seek original studies regarding this relationship and supplement existing literature. First, we seek research on the relationship between sustainable transport policy and the environment from different perspectives, such as different countries (both developed and developing countries), different levels (country, region, industry, firm and household levels), different types of transportation (car, bus, bicycle, subway, train, ship and airplane), different environmental indicators (energy, pollution and greenhouse gas) and different types of energy (fuel oil, natural gas, electric power and other new energy). Second, we encourage that using novel (both theoretical and empirical) methods to analyze the above relationships. Third, we encourage research that discusses the heterogeneous impacts of transport policy on different countries, regions, firms, households, energies, etc. Fourth, we also welcome other studies on environmental management and energy economic development.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
