Message from the Guest Editor

Dear Colleagues,

Sustainable management of water resources are required to tackle the impacts of global climate change. The alterations of rainfall patterns, changes in water quality, quantity and harvesting aspects, variations in groundwater and surface water etc. are observed due to the effects of emissions of green house gases. Sustainable water resources management is thus facing challenges to cope with these alterations. Researches are being carried out to cope with these alterations around the world ranging from water security to water borne diseases. Under the goal of sustainability, water resources systems could be used in effective and efficient ways, without providing negative impacts to the environments and communities. The aims of this Special Issue are to publish the latest reviews, research articles and technical notes in broader ranges of topics on sustainable water security and management under climate change.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
