Message from the Guest Editors

This Special Issue, Sustainable Construction II, comprises selected papers for *Sustainability*. Construction is one of the main sectors generating greenhouse gases. This industry consumes large amounts of raw materials, such as stone, timber, and water. Additionally, infrastructure should provide service over many years, without safety problems. Therefore, their correct design, construction, maintenance, and dismantling are essential in order to reduce economic, environmental, and societal consequences. This is why promoting sustainable construction is becoming extremely important nowadays. This Special Issue is seeking papers that explore new ways of reducing the environmental impacts caused by the construction sector, as well promoting social progress and economic growth.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
