Deadline for manuscript  
submissions:

**30 June 2022**

### Message from the Guest Editors

Dear Colleagues,

The main aim of this Special Issue is to collect results of research on the impact of climate change and human activity on the hydrological regime of rivers, lakes, and groundwater in different regions of the world, mainly in terms of transformation of the regime characteristics, their stability and predictability, and also quantitative and qualitative assessment of water resources with regard to their sustainable development. Particularly invited are papers on methods of detecting changes in the hydrological cycle in areas with diversified environmental conditions, e.g., with water deficits, and their consequences in quantitative, qualitative, physico-chemical, biological, socio-economic, and other aspects.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
