### **Message from the Guest Editors**

Dear Colleagues,

Landslide phenomena can have significant impacts on people's life, health, and property. Natural hazard can be analyzed from a multidisciplinary perspective: Social and economic impact, "natural environment" impact, and psychological and physical impact. The reduction of the impact of landslides can be addressed by adopting a number of appropriate strategies and methodologies. However, it is important that the methodologies and approaches used be sustainable and community-based, that is, integrated approaches that take into account the social, cultural, political, and economic dynamics of the potentially affected territory. 'Community-based' means working with communities to identify and provide solutions to landslide vulnerability together. This Special Issue wants to address the sustainable and community-based approaches to enhancing strategies for avoiding or reducing landslide impact on people, private and public building, lifelines, and the natural environment.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
