Message from the Guest Editor

Dear colleagues,

Sustainability is a recent thrust in many areas of engineering and science. Sustainable built environment is crucial to make our planet greener and a better place for the future generation. In this context, sustainable construction materials would play a significant role for the sustainable development of built environment comprising buildings and civil infrastructure, such as roads, bridges, and tunnels. This special issue of Sustainability is on “Sustainable Construction Materials”. It belongs to the section “Sustainable Engineering and Science” of Sustainability. You are humbly requested to contribute high-quality research or review articles to this special issue, emphasizing sustainability of building or infrastructure materials, utilization of recycled and industrial or agro waste materials, use of renewable materials, durability and service life of materials, sustainability assessment methods for materials, energy savings associated with application of materials, costs versus benefits of materials, and environmental protection in relation with fabrication and use of materials.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
