### Message from the Guest Editor

Sustainable corporate finance is quickly becoming one of the biggest issues facing the corporate world. Environmental and social issues may threaten the financial and operational viability of any businesses that ignore them. The focus of academic research is shifting from a pure shareholder-centered profitability-oriented view towards a business strategy that aligns risk-return goals with a company's ESG and CSR policies. Capital flows (capital raising and investment), risk management (insurance and risk assessment), corporate governance (monitoring and incentive), and financial processes (disclosure, valuation, and oversight) all assimilate environmental and social factors to manage risk, promote sustainable growth, and fight for the long-term stability and survival of a business. The goal of this Special Issue is to provide guidelines on how to make these alignments efficient.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
