Message from the Guest Editors

Dear Colleagues,

Social networks are important in today's life and in times of pandemics such as the one we are living in. In social networks, online and streaming discourse occurs in different areas such as politics, social and sustainable education, ethics, and it is quite possible and normal to find many fake news on these networks. With the advent of new technologies, the concept of public sphere is redefined, including these new media. The new cyberspaces are a new conception of the public sphere, as a place of information, contestation, organisation, discussion and political, social, educational, ethical, sustainable, etc. struggle. This rise of social networks in the current context arises from a deterioration of the conventional public sphere, giving rise to this new public sphere in which citizens can find and exchange dissimilar points of view.

This special issue is framed around social media and the sustainable approach to research. Researchers can make scientific contributions on topics such as social networks and politics, social networks and education, social networks and sustainability, fake news, public ethics and sustainable education models.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
