Message from the Guest Editor

This Special Issue focuses on the new framework of the meat industry directed towards modern-day consumers. Sustainability in meat production should refer to the whole production chain, including the processes of quality control and management. However, changing the meat industry into an environmentally friendly and welfare-friendly enterprise requires the substantial modification of its policy and strategy, and for now, it is a step-by-step process. These modifications should cover 'from farm to fork' traceability, supported by product certification and labelling. Attitudes towards meat consumption are variable. Part of the public opinion favours small, family farms, because the big scale animal production is indicated as the greatest source of environmental damage, and is connected with insufficient level of welfare. On the other hand, there is a part of the community that has decided to significantly limit or even stop meat consumption.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
