Sustainable Freight Transport

Message from the Guest Editors

We are calling for papers for a Special Issue of the journal Sustainability on research into collective interventions to radically reduce greenhouse gas (GHG) emissions from freight transport, in line with the political targets of COP21 to COP23. In order to meet these targets, by 2050, freight transport should have reduced its GHG emissions by 80–85%. This reduction represents a significant challenge with multiple technical, operational, and political aspects. Designing, testing, and implementation of effective interventions (managerial or technical) and appropriate policy measures need multi-disciplinary, multi-country research. Ultimately, proposed papers for this Special Issue may cover a broad range of private strategies and public interventions, as long as the focus is on GHG reduction. Papers should concern specific reduction measures or approaches to support these, including a clear discussion of the expected impact on global GHG emissions.
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
