### Message from the Collection Editor

Dear Colleagues,

This Special Issue will comprise papers covering a wide range of aspects related to designing sustainable future societies. Despite the fact that scientists have issued various ultimatums into the future of the earth including biodiversity, climate change, biochemical flows such as nitrogen and phosphorus, and so on, our society remains stuck with the traditional market and democracy and cannot create sustainable social systems including future generations. While the market is ‘an extremely good device for realizing the short-term desires of people,’ it does not ‘allocate resources in a way that takes account of future generations’—the future generations cannot participate in today’s markets. Likewise, democracy is not ‘a device that incorporates future generations;’ it is ‘a device that profits people who live now’.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
