Message from the Guest Editors

In the process of transforming from production-oriented manufacturing to service-oriented manufacturing, cloud manufacturing (CMfg) offers an attractive solution. It provides the shared pool of configurable computing resources and the sustainable manufacturing services for the entire lifecycle of manufacturing, under the support of cloud computing, Internet of Things (IoT), virtualization and service-oriented technologies, and advanced computing technologies. With the development of new generation of intelligent technology (brain science, cognitive science, artificial intelligence, etc.), CMfg has entered its 3.0 era and made great achievements. However, existing research has seldom taken the influence of CMfg on sustainable development into discussion, although sustainability is indispensable in the CMfg environment. Thus, this Special Issue aims to collect and present research related to the topic, titled “Sustainable Industry and Production: Cloud Manufacturing Service Sustainability.”

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
