Message from the Guest Editors

Dear Colleagues

Irrigated agriculture contributes some 60% of total global food and fiber production—a vital contribution to feeding and clothing the world. It is also the main consumer of water in many countries, causing environmental problems such as aquifer depletion, reduced and salinized river flows, land subsidence, waterlogging, and pollution from agricultural chemicals. Irrigated agriculture is thus a major factor in quantitative and qualitative water scarcity, contributing substantially to environmental problems for other users and for the irrigation sector itself.

Governance comprises a *political* process defining sectoral objectives, a *legal* process to translate these objectives into enforceable rules for water management, and *institutional* arrangements to implement these rules.

Papers addressing one or more of the following are invited: Providing an overview of the impacts of poor water management; Describing effective and proven modes of governance to address quantity and quality issues; Describing novel or successful techniques to measure and monitor water quantity, quality and environmental impacts, thus providing the basis on which decisions are made.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
