Message from the Guest Editors

Sustainable mobility in urban and peri-urban environments is enhanced using different types of interventions and transport policies, such as implementing traffic calming devices; defining appropriate regulations; building infrastructure for pedestrians, cyclists; public transport; and innovative/future mobility.

Research often focused on the effects of these interventions on mobility from a transport demand/supply perspective and on the environmental impacts. However, investigating the possible effects of traffic calming measures and infrastructure for non-motorized users using a macro-level systemic approach is important. This means considering safety and mobility aspects for all road users and the necessary trade-offs that may occur (e.g., reducing the vehicular serviceability for promoting sustainable mobility and protecting vulnerable road users).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
