Deadline for manuscript  
submissions:

**closed (30 January 2023)**

### Message from the Guest Editors

Soils comprise some of the most complex and biologically diverse environments on earth. They underpin all terrestrial ecosystems and play crucial roles in human food security and the mitigation of climate change. However, land use change, climate change, and human mismanagement are physically, chemically, and biologically degrading earth's soils. Therefore, it is paramount to build our knowledge of these complex and still insufficiently understood systems. It will be especially important to understand how increasingly severe droughts, intense precipitation events, and altered atmospheric interactions will impact soil behavior and resilience.

A greater understanding of the soil resource and how it can be more sustainably managed is a prerequisite to safeguarding the primary provisioning and regulating ecosystem services provided by soils. Therefore, understanding the role of soils in sustainability is critical not only to advance environmental science but also to inform societal action and government policy.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
