Message from the Guest Editor

Cities and regions are the centers of economic activity and host the majority of the world's population. Transportation is the link between the economic activities of businesses and the places where individuals live, work, shop, enjoy their leisure time, etc., and thus its role is essential.

In the early days of transportation research the focus was on the importance of the provision of adequate transportation facilities to foster local economic development. At present, researchers and policymakers are often more concerned with the demand side, trying to find effective and efficient ways to tackle the adverse effects associated with transportation (noise, local and global pollution, congestion, soil sealing, etc.).

The purpose of this Special Issue is to stimulate high-quality research on economic aspects of sustainable transportation, focusing at a local (regional/urban) scale.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
