Deadline for manuscript  
submissions:

**closed (5 August 2022)**

### Message from the Guest Editor

We are at a moment in history when ensuring the use of water in ways that meet both current and future socioeconomic and ecological demand is more important than ever. With increasing water and food demand worldwide, research is needed to help to provide relevant and timely information for managing water resources from local to global scales. As society faces increasing uncertainty and variability around climate, the sustainable management of precious water resources is a must to mitigate risks.

As such, this Special Issue aims synthesize state-of-the-art science around sustainable management of water resources with an eye to assessing the resilience and vulnerability of water as a resource. We invite studies highlighting ongoing and potential future efforts, mechanisms, and approaches explicitly targeting how to characterize and increase sustainability in connection with water resources. We especially seek studies that use approaches to managing land and natural environments in ways that balance social, economic, and ecological needs while considering the impact on water resources (both quantity and quality).

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
