**closed (31 December 2020)**

### Message from the Guest Editors

Dear Colleagues,

In 1958 urbanist Jane Jacobs wrote “there is real potential in the street.” Sixty years later, this potential remains. In this Special Issue we invite a dialogue of perspectives on the street, one that we hope will appeal to a wide range of sustainability scholars and practitioners: How do good/effective streets of all types contribute to sustaining us individually and communally in the city? Conversely, how do we promote sustainability on and near streets so that they may continue sustaining urban life?

We hope this special issue expands the space of possible insights, technologies and best practices as they address the city street. We invite contributions from a wide range of research approaches: Empirical to experimental, conceptual to mixed-method. While we highlight the local, there is room for research at multiple scales. We especially welcome comparative and case studies.

Prof. Ken Tamminga

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
