### Message from the Guest Editor

Dear Colleagues,

This Special Issue welcomes the submission of original studies and reviews that addresses the analysis, methods or tools used to support an integrated understanding of energy system sustainability and its necessary technological and structural transformations.

Topics we aim to cover include: modelling tools and assessments for energy system transformation towards sustainability, the interlinkages between energy and other SDGs in energy system planning, innovative and sustainable solutions for energy systems, environmental, social and economic impact assessment of energy system development, energy efficiency, low-carbon technologies, renewable energy, energy justice and resources consumption in energy system transformation, policy assessment to support the development of a future sustainable energy system.
