Message from the Guest Editors

Dear Colleagues,

While the pursuit of productivity and efficiency in industry has resulted in the development of infrastructure, our social interests have shifted to sustainability, which respects environmental issues, people's fundamental rights, cultural diversity, human well-being, and the equality of human life. Manufacturers need to expand their views, from competitive product development to systemic transformation, in a way that can satisfy these new interests and demands. To achieve this, manufacturers should contribute to realizing sustainable socio-technical systems, which are dynamic and self-organizing relationships on personal, organizational, and social levels.

For this Special Issue, we invite articles that foster discussion regarding the design and development of products, product-service systems, and manufacturing systems that will contribute to a sustainable society, management strategies for sustainable development, and the design and innovation of resilient socio-technical systems. This area of interest also includes servitization using smart technologies, such as cloud computing, Internet of Things (IoT), and cyber-physical systems (CPS).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
