Message from the Guest Editors

Dear Colleagues,

In 21st century information societies, individuals who research, question, think critically and have high problem solving skills are needed. It is seen as a necessity for education systems to be partners in the change for the development of societies. In this context, one of the most important elements of sustainable development is the education system. Especially with COVID-19 around the world, online education has become more common, and has gained importance to support teaching activities with technology-supported teaching methods. In this context, the aim of this Special Issue is to introduce modern teaching methods to be applied in the teaching process and to present guidelines for their effective use. In addition, it aims to put forward suggestions for the realization of effective learning by addressing the problems experienced in teaching activities. We look forward to the contributions of relevant researchers in revealing the impact and importance of teaching methods in different levels of methods in different levels of education, in different age groups and in different disciplines.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
