Message from the Guest Editor

Dear Colleagues,

Transport is an important source of local, regional, and global pollution. In addition, given current technology, transport is likely to remain fossil fuel-intensive in the immediate future. However, transport is also strongly tied to both development and industrialization, and mobility is important for quality of life. This special issue will focus on sustainable transportation and transport and the environment, broadly defined. Papers might focus on the impact of transportation or the potential technical and/or institutional solutions. The level of analysis could be local, regional, or national, and methods employed could range from case-study to regression. Submissions employing multidisciplinary approaches are particularly encouraged.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
