### Message from the Guest Editors

This Special Issue is intended to have a cross-disciplinary look at the circular economy, sustainability, and digital marketing. The discussion between marketing and sustainability has been widely explored by researchers, resulting in the fact that both concepts have mutual things to offer each other. Marketing allows greater behavioral comprehension of the clients and influences society's attitudes and beliefs. Sustainability favors the obtaining of improvements in the supply chain, the differentiation of products, access to aware investors, or a bigger commitment of the employees.

We would like to see profound and rigorous theoretical and managerial contributions that advance digital marketing and challenge existing theories used in global management and business research, performance, and competitive advantage. As such papers must be able to demonstrate clearly a significant contribution in the field of sustainable circular economy.
