Message from the Guest Editor

Dear Colleagues,

Urbanization can have severe negative environmental impacts, including the urban heat island effect, an increase in rainfall runoff, biodiversity loss, deterioration of air quality, and loss in carbon sequestration, with consequent effects on ecosystem functioning. Moreover, with ongoing climate change, the degradation of ecological systems will lead to a further decline of human well-being. Urban greenspaces, which have increasingly been recognized as multifunctional urban green infrastructures (UGIs), can address these major urban challenges through the provision of ecosystem services. Therefore, new interdisciplinary knowledge and innovative strategies for sustainable land-use, planning, and the design of valuable city landscapes with integrated UGIs are of paramount importance.

In this context, this Special Issue of Sustainability aims to bring together multidisciplinary knowledge and cross-sectoral approaches in order to better understand the provisioning, regulating, and cultural ecosystem services of urban ecosystems through sustainable planning, design, and land use.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
