Message from the Collection Editors

This Topical Collection will focus on urban energy management and sustainable transportation systems, with emphasis on bottom-up approaches that consider local renewable sources and storage systems in a flexible micro-grid environment, under the presence or absence of smart mobility, applied in different buildings that as a whole have the characteristic to be identified as Net-Zero Energy Buildings. The new methods of modeling and systems characterization will be further lifted to a larger scale consisting of multiple buildings under an urban scenario where different forms of transportation interact and communicate with the integrated system, thus creating the so-called Multi-level System-of-Systems approach (MLSoS).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
