### Message from the Guest Editors

This Special Issue aims to contribute to the theoretical and empirical knowledge to better understand and address future urban planning challenges associated with the rise of AV. Topics of interest include, but are not limited to:

- Potential impacts of AV on land use and location choices
- Interaction of the transport system with built environments and land use
- Influence of urban form and distribution of land uses on mobility
- Urban planning concepts, methods, and tools for sustainable urban futures
- Land use and other transport, economic and social policies to prepare cities and regions for the advent of AV
- Role to be played by planners, policy-makers, and stakeholders to address the transition to autonomous mobility
- Proactive, adaptive, and collaborative planning
- Urban redevelopment and regeneration opportunities
- Zoning alternatives and other land-use and development regulations
- Rethinking and redesign of urban streets and public spaces
- Parking demand, design requirements, and relevant policies

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
