Message from the Guest Editor

WISA is one of the main security research venues hosted by the Korea Institute of Information Security and Cryptology (KIISC) and sponsored by the Ministry of Science, ICT and Future Planning (MSIP), and co-sponsored by the Electronics and Telecommunications Research Institute (ETRI), the Korea Internet and Security Agency (KISA), and the National Security Research Institute (NSRI). It has successfully played an important role in the Korean flagship international security conference in particular. The primary focus of WISA 2020 will be on systems and network security, including all other technical and practical aspects of security applications. This Special Issue will include extended versions of selected papers from WISA 2020, along with general papers closely related to the conference themes.

We believe that this Special Issue will showcase the latest advances in systems and network security through the publication of not only the extended versions of outstanding papers presented at WISA 2020 but also general submissions of high quality.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
