Message from the Guest Editors

Recent projections on population growth and associated growing water demands in combination with climate change reemphasise the vulnerability of large regions of the African continent to global change with increasing risks to ensure water security across the continent. Additional human drivers also exaggerate the risk for Africa's future water security and, by this, its socioeconomic development.

With a wide scope of papers, we invite authors to submit manuscripts addressing existing and planned observation efforts, research on climate and land management change impact on water resources, water economics and governance, water risk planning and responses, as well as general articles contributing to a better understanding of the biophysical, economic, social, cultural, technological and institutional drivers and barriers of current and future water security in Sub-Saharan Africa.

We would like to particularly encourage researchers and practitioners to submit manuscripts originated in or jointly developed by African institutions. Early career scientists from Africa are particularly encouraged to submit manuscripts to this Special Issue.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
