Deadline for manuscript submissions:

closed (30 April 2021)

Message from the Guest Editor

Monitoring and managing distributed water, sanitation, agricultural, and energy resources and services in remote and/or low-income regions are increasingly important as population pressures and climate change impact the reliability of these resources. The aim and scope of this Special Issue of *Sustainability* is to present and review emerging methods and technologies including “internet of things” sensor systems, cellular-based data collection, remote sensing, machine learning, and other analytical tools designed to support the remote monitoring and management of water, sanitation, agricultural, and energy resources in remote and/or low-income regions. Examples may include remotely reporting sensor technologies for monitoring water service infrastructure; satellite-based remote sensing of agricultural yields; localized air quality monitoring; cellular-based survey and decision support tools; and machine learning-enabled analytics. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
