Message from the Guest Editor

Most discarded waste can be reused or recycled, one of the principles of most waste management philosophies. There are many types of techniques that are being practiced to minimize environmental waste impact such as landfills facility, composting waste, recycling waste, converting waste to energy, and using as fertilizer for plants. All of these techniques have minimized the waste impact on environmental but have not provided a sustainable environmental solution. The goal of the papers to provide article focusing on sustainable environmental solution that will improve the environment, ecosystem, and minimize waste.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
