Deadline for manuscript
submissions:

closed (15 February 2023)

Message from the Guest Editor

This Special Issue aims to bring together recent advances in regional water assessments across a range of time scales, from the historical change perspective to future change scenarios. For a better understanding of the physical mechanism of the water cycle change, contributions based on new observations or reconstruction data, state-of-the-art modeling approaches, and advanced analysis methodologies are highly welcome. Future emission scenarios, as in the IPCC's Sixth Assessment Report (AR6), are encouraged to be considered as a standard for impact and risk assessment studies.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
