Deadline for manuscript  
submissions:

**closed (10 April 2023)**

### Message from the Guest Editors

Most of the existing literature covers the topic in the context of water supply systems, while its application in wastewater and stormwater systems has been relatively less addressed. Energy optimization in large urban infrastructure systems also needs further attention, as most of the past studies evaluated smaller systems or hypothetical scenarios. Most of the related work was conducted in developed countries operating continuous water supply systems, while the evaluation of intermittent supply operation in developing countries and arid regions might come up with new and interesting findings. Although greywater recycling with low-cost treatment at the point of generation can conserve water resources, it can impact the wastewater-to-energy option. Emerging concepts of sponge cities can certainly recharge groundwater, but the reduced runoff could impact hydropower generation.

There are several other questions that need to be answered. This Special issue is an effort towards addressing these questions and bridging research gaps.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
