### Message from the Guest Editors

This Special Issue is dedicated to sustainable water management, with a focus on the economics and governance aspects, or the fundamental basis of the role institutions can play. The aim of the Special Issue is to disseminate current knowledge and recent developments to demonstrate good practices, share experience and lessons learned, stimulate discussion and reflection, and, thus, promote a paradigm shift and transformative change towards sustainable water management. Of particular interest are innovative approaches and tools available for supporting, operationalizing and delivering sustainable water management that is inclusive, resilient and adaptive. We hope to cover the full spectrum of water use and conservation to glean management lessons, identify barriers for transformative change, and inform on the global water agenda and initiatives for sustainable development.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
