Message from the Guest Editors

Dear Colleagues,

Water Resource depletion is one of the most pressing issues facing human and natural systems. The availability of water resources is a condition for achieving the wellbeing of citizens. The efficient management of water resources plays a crucial role in sustainable development and in strengthening the resilience of environmental, economic, and social systems in the face of climate change. While the preponderance of research on water resource management and sustainable development comes mainly from the natural sciences, the role of psychology in understanding and addressing the problem of the efficient use of water resources is not widely recognized. Transition to a sustainable future and a sustainable economy requires an informed multidisciplinary understanding of how people experience, appraise, adapt, and respond to water resource management. The present Special Issue deals with—but is not limited to—the integrated management of water resources, general issues related to sustainable development, and sociopsychological perspectives of sustainable use of water resources and climate change adaptation.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
