Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editors

This Special Issue of *Sustainability* seeks original research and review manuscripts on woody, horticultural, and ornamental crops to confront saline and water stress, with a focus on:

- Irrigation strategies to optimize water use efficiency
- Monitoring techniques by soil–plant-based sensors for sustainable irrigation management
- Use of non-conventional water resources for irrigation: wastewater, saline, and desalinated water
- Innovate approaches for assessing both stresses (spectral and thermal information)
- Physiological and agronomical crop performance
- Use of biostimulants in agriculture (arbuscular mycorrhizal fungi and plant-growth-promoting bacteria, among others).

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
