Deadline for manuscript
submissions:

28 February 2022

Message from the Guest Editor

Dear Colleagues,

The work environment of the current age is characterized by rapid changes, a short-term focus, and frequent reforms. Organizations are dealing with a changing workforce in a global, highly competitive environment. As human resource is the most important asset of the organization, managers see work motivation as an integral part of the performance equation at all organizational levels. The goal of the special issue is to promote research from different perspectives on sustainable work motivation.

We encourage submissions of empirical research from any theoretical perspective that fall broadly into one of the following areas. Submissions in related areas that include valuable discussions in these directions will also be considered:

- The effects of the pandemic and work-from-home on work motivation
- The cognitive and physiological processes underlying work motivation
- The effects of motivation in well-being and work satisfaction
- Field experiments on work motivation
- Practical interventions and remedies aimed at increasing motivation
- Generational differences in work motivation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
