Message from the Guest Editors

Dear Colleagues,

An innovative economy model based on the sustainable use of renewable resources in agriculture and industry which takes biodiversity and environmental protection into account is important in the current international scenario. To this aim, some key factors are needed: the development of new technologies and processes, the identification of renewable feedstock not in competition with other production chains, the creation of new markets and competitiveness, and the encouragement of policymakers and stakeholders to work more closely together.

The transformation towards a circular bioeconomy and the application of green and blue technologies are parts of the solution to several of the sustainability challenges facing society today. Therefore, by expanding the market for sustainable agri-food products, transforming the industrial sector, and supporting rural development, the agri-food system enhances economic growth and creates new jobs across all sectors of society.

The main scope of this Special Issue is innovative studies and research, also from technological and economic perspectives, which address the above topics. We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
