Message from the Guest Editors

We extend an invitation to publish your research in this Special Issue on *Sustainability*. The field of sustainability includes projects on housing infrastructure, roads, bridges, tunnels, ports, airports, factories, shopping centres, offices, and warehouses, among others. The execution of these projects involves collaboration between public and private sectors, including architects, engineers, companies, and financiers. The construction industry forms the basis of the three major economic sectors. It is intermediately positioned between industrial activities and services.

The purpose of this Special Issue is to offer valuable insights into sustainability in various construction-related issues, with a specific focus on methods, empirical evidence and applications, simulations, as well as conceptual frameworks. We seek sustainable solutions for the construction industry, related to the five common phases: (1) feasibility, (2) design, (3) execution, (4) commissioning and operation, including maintenance, and (5) demolition.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
