### Message from the Guest Editor

This Special Issue focuses on the broad topic of research methods and techniques for supply chain modeling, trade flows analysis, and strategic supply chain optimization. Empirical and theoretical articles dealing with issues such as the modeling and analysis of a supply chain network, international operations management, supply risk management, and the role of a supply chain in international trade flows are welcome.

In addition, research topics in the field of digitalization of supply chains also play an important role in this special issue. Novel scientific contributions focusing on the measurement of the future impacts of digitalization on sustainable supply chain, supply chain efficiency, supply chain resilience, supply chain integration, and performance by applying mathematical and econometric modeling are encouraged.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
