Message from the Guest Editors

This Special Issue aims to highlight and promote the concept that resilience, sustainability and smartness are strictly interconnected features that are all essential for urban systems. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Methods and technologies to build awareness and foster knowledge on possible impacts posed by natural and human-made hazards and the great opportunities that resilience strategies can bring.
- People-centered approaches to resilience, sustainability and smartness.
- Life cycle assessment frameworks and approaches to assess tangible and intangible impacts and benefits of sustainable resilience strategies for the built and/or natural environments within cities.
- Standards and policies for jointly building and addressing resilience, sustainability and smartness.

Deadline for manuscript
