Deadline for manuscript  
submissions:

**31 May 2022**

### **Message from the Guest Editors**

Dear Colleagues,

Research on flood risk (FRM) and water resources management (WRM) have come a long way in past decades. From inter- and/or trans-disciplinary approaches, decision-makers have various options to address the different issues on these topics, from the investigation, analysis, and planning, to the identification and implementation of sustainable solutions. The rapid expansion of urban areas, now with more inter-connectivity and dependency on their infrastructure, gives us a glimpse into the need to re-think our approaches to FRM and WRM. In-line with this, what is of interest is the investigation of the cascading impact on the system (society and infrastructure) caused by disasters, and climate and land-use change and management, to name a few.

This Special Issue aims to highlight innovative research on cascading impact of FRM and WRM for a more sustainable solution in an ever-changing urban environment. The research scope includes, but is not limited to, the cascading impacts on the risk, critical infrastructure, society, and the human–water system.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
