Message from the Guest Editors

Accounting for sustainability involves a set of applied principles, practices and standards of reporting true and fair conditions in temporal project organizations, as well as organizations that will remain. This Special Issue aims at welcoming a broad set of research studies that shed light on accounting and control for sustainability in both temporal organizations and organizations that will remain. Contributions are not limited to reported sustainability measurements, or outcomes and performance, but also processes that drive certain outcomes (sustainability processes). We hope to receive a broad spectra of empirical contributions as well as reviews that cover important aspects in this domain. This Special Issue will support existing literature with concurrent problems and shed light on how different processes support the definition of targeted processes and outcomes. This Special Issue will encircle accountability on processes that drive certain outcomes as well as the ultimate reported and verified sustainability activities.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
