Message from the Guest Editors

Sustainable agricultural practices need to be documented by highlighting appropriate strategies for the conservation of natural resources, sustainability impacts of alternative options such as organic agriculture, use of best management practices, and clean production efforts. There is also a need to document and offer research and policy insights related to the development/refinement of indicators linked with sustainable agriculture. Additionally, work related to the challenges and constraints in the adoption of sustainable agricultural practices would be highly useful to formulate informed policy interventions with possible impacts on output, livelihood, rural incomes, and food security aspects. Moreover, this Special Issue will also focus on presenting work related to various approaches and their possible impact on achieving agricultural sustainability in the context of fast-changing climatic dynamics particularly in the case of developing countries.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
