Message from the Guest Editors

Climate change has adverse effects on agricultural production and places food security at risk. Enhancing adaptation capacity is essential for the survival of the agricultural sector in many parts of the world. However, such capacities are usually place-and context-specific, and therefore no single adaptation method can be used across all settings. Despite some progress, the adaptations and methods taken so far are insufficient to address the long-term impacts of climate change. Much more needs to be done to understand how agricultural adaptation can be supported. Robust and transparent assessment approaches should be developed to help adaptation planners and practitioners identify the most appropriate interventions. To be effective, this should be done in collaboration with stakeholders following an iterative process of social learning and change.

The aim of this Special Issue is to share the latest developments in agricultural adaptation practices, tools, and policies. We invite original research articles and review papers in a variety of topics. Please visit the special issue page for more information.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
