Deadline for manuscript  
submissions:

**closed (31 March 2019)**

### Message from the Guest Editor

The food system encompasses the chain of activities associated with production in the field, processing, marketing, consumption, and waste disposal, as well the resources required and the impact caused by those processes (Tansey and Worsley, 1995; Lang et al., 2009). The term “agri-food system” is often used to emphasize the role of agriculture (e.g., OECD/FAO, 2016). The proper functioning of the food system is vital to society. Assessing agri-food systems’ sustainability is a complex matter, due to the multi-functional nature of agriculture and the multi-scale nature of the relations between agroecosystems and socio-economic systems (Smil, 2000; Giampietro, 2004; Conway, 2012). The globalization process introduces further complexity into the functioning of agri-food systems.

This Special Issue welcomes papers that:

- address biophysical and socioeconomic issues relevant for better understating the complex functioning of the food system;
- discuss pros, cons, and trade-offs of potential “solutions”, envisaged policies, and scenarios;
- present tools able to address the challenge posed by the complex

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
