Message from the Guest Editors

Dear colleagues,

Substantial efforts are needed to reduce the environmental footprint of agricultural activities and, more broadly, of food systems. There are multiple economic, institutional, and psychological lock-ins which prevent farmers from switching to more sustainable farming practices and fully engaging in the agro-ecological transition.

The scope of the Special Issue the scale-up of the agri-environmental transition. It targets research which could contribute to filling the knowledge gap on economic or behavioural incentives able to unlock the sustainability transition process at a large scale in the agricultural sector. Priority will be given to articles providing evidence-based results (in particular, using experimental and quasi-experimental approaches) and discussing the feasibility of the solutions proposed.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
