Message from the Guest Editors

Dear Colleagues,

In recent decades, our planet has faced important challenges at economic, environmental, governance and social levels. It is time that, from architecture and the building sector, we minimize our negative impacts and maximize our contribution to sustainability.

Nevertheless, in order to effectively optimize our buildings and cities we must quantify and qualify their sustainability. This assessment is also required in order to choose the best alternative for each case. In this regard, to evaluate the environmental impact there are numerous models, rating and software tools. Similarly, there are methodologies to assess economic and social impacts, as well as models capable of integrally evaluating more than one sustainability branch.

This Special Issue aims to carry out an updated review of the available methodologies and tools to evaluate alternatives, which could move us toward a more sustainable architecture. At the same time, it endeavors to compile different outstanding cases in which the sustainability of architectural cases and their construction, rehabilitation and restoration are presented.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
