Deadline for manuscript submissions:
closed (31 March 2022)

Message from the Guest Editor

This Special Issue aims to discuss new applications of artificial intelligence methods in various industrial and research solutions contributing to the sustainable development of processes, focusing on applications in materials diagnostics and other industrial technologies and presenting strengths and weaknesses, but also opportunities and limitations from their application with regard to sustainable development. This Special Edition will provide an opportunity for academia and industry to present innovative solutions for the application of artificial intelligence in the diagnostics of materials and technologies for sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
