Message from the Guest Editor

Dear Colleagues,

Evidence suggests that biodiversity loss can affect ecosystem functions and services. Ecosystem functions are positively related with biodiversity, and hence, biodiversity and ecosystems are managed and conserved for multiple services to human wellbeing. Maintenance of ecosystem services promotes a long-term environmental sustainability, which can be achieved through assessments of the current state of knowledge regarding climate change, land use activities, biodiversity, ecosystem functioning, and ecosystem services in various biomes, including terrestrial, marine, and freshwater systems. This Special Issue aims to address the role of biodiversity in ecosystem functioning and ecosystem goods and services in various forms of ecosystem, including terrestrial, marine, and freshwater systems. Both review and field-oriented scientific papers addressing the loss of biodiversity due to climate change, land use change, and other human-mediated disturbances affecting ecosystem functioning and sustainability of ecosystem services are particularly welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
