Deadline for manuscript  
submissions:

**30 November 2020**

### Message from the Guest Editors

Dear Colleagues,

Global economic growth is slowing, and several economies are suffering from recession, unemployment, and/or environmental destruction challenging sustainable development. These developments are reinforced by the current COVID-19 pandemic. Developments in biology are expected to allow for technical change addressing many of these challenges. Reaching these expectations will require an institutional and policy environment supporting investments and technical change. This Special Issue examines the possible contributions of the bioeconomy to economic growth, employment, and the environment and addresses how institutions and policies can support these contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
